Re: University of Puerto Rico Retirement System / Actuarial Valuation as of June 30, 2009

Dear Board Members:

This report presents the results of the actuarial valuation of the University of Puerto Rico Retirement System (the “**Retirement System**” or the “**System**”) as of June 30, 2009. This is the sixth actuarial valuation prepared by Buck Consultants, LLC (“**Buck Consultants**” or “**Buck**”). The purpose of this report is to:

- determine the employer contribution required to fund the Retirement System on a sound actuarial basis,
- provide a summary of the funded status of the System, and
- present the financial statement disclosure information according to GASB 25 and 27.

Amendments and Other Changes Affecting the Financial Status of the System

There were no amendments or changes to the benefit provisions employed by the Retirement System that affected its financial status for the year ending on the valuation date. All methods and assumptions employed to develop the results presented herein remain unchanged from the previous valuation. A summary of the assumptions and methods and the System benefit provisions reflected in the valuation are presented in tables X and XI respectively.

Discussion of Valuation Results

The actuarial valuation as of June 30, 2009 indicates that an expected employer contribution of **\$64,866,256** (a rate of **11.4%** of payroll) is required to meet the employer normal cost and to amortize the Unfunded Actuarial Accrued Liability over 30 years from July 1, 2009. The following table presents the Employer Costs, Annual Required Contribution (ARC) Rates and amounts, the

employer cash contributions effected, the Annual Pension Costs under GASB 27, and the Net Pension Obligation (NPO) for the years ending June 30 2009 and 2010.

	Year Ended <u>06/30/09</u>	Year Ended <u>06/30/10</u>
Projected Employer Costs	\$60,113,719	\$64,866,256
ARC (payroll) Rate	11.1%	11.4%
Annual Required Contribution (ARC)	\$64,072,208	To be Determined
Employer Cash Contribution	\$72,605,262	To be Determined
Annual Pension Costs (GASB 27)	\$62,929,059	To be Determined
Net Pension Obligation (NPO)	(\$46,187,467)	To be Determined

Even though the ARC (payroll) Rate remained relatively stable (increasing slightly from 11.1% to 11.4%), the increase in Employer Costs from last year's valuation is due mostly to the asset losses incurred last year.

Contents of the Report

The development of the Employer Cost and the Annual Required Contribution Rate (ARC) for the year ending on June 30, 2010 is presented in Table II. The development of the Annual Required Contribution amount and the accounting disclosures required by GASB Statement 25, as well as the determination of the Annual Pension Cost requested by GASB Statement 27 is presented in Table III. A three-year pension cost trend information is also included on Table III.

Tables IV through VII provide a summary of the participant population, including a breakdown by status (active, retired, deferred vested) and a variety of useful information such as historical average age, service, and salary, a distribution of active participants by Certification number as well as an age-service distribution of active participants with average pay in each respective age-service bracket.

Tables VIII and IX include a breakdown of the System's assets by investment category, a reconciliation of the market value of assets from beginning to the end of the fiscal year, the development of the Actuarial Value of Assets, and the historical asset yields from 1996 to the valuation date.

Finally, table X sets forth all the actuarial assumptions and methods that were used to perform the valuation, and table XI sets forth the System provisions that have been used in determining the liabilities presented in this report.

Certification

To the best of my knowledge, this report fairly and accurately presents the liabilities of the System as of June 30, 2009, based on the participant data and asset information provided by the System's Administrator, and the Retirement System benefit provisions and actuarial assumptions and methods set forth herein. Furthermore, it is our understanding that all known events or trends that may require a material increase in System costs or required contribution rates have been taken into account in the valuation.

Respectfully submitted,

Héctor D. Gaitán

Héctor D. Gaitán, FCA, ASA, MAAA
Office Manager & Consulting Actuary

6. Additional Information

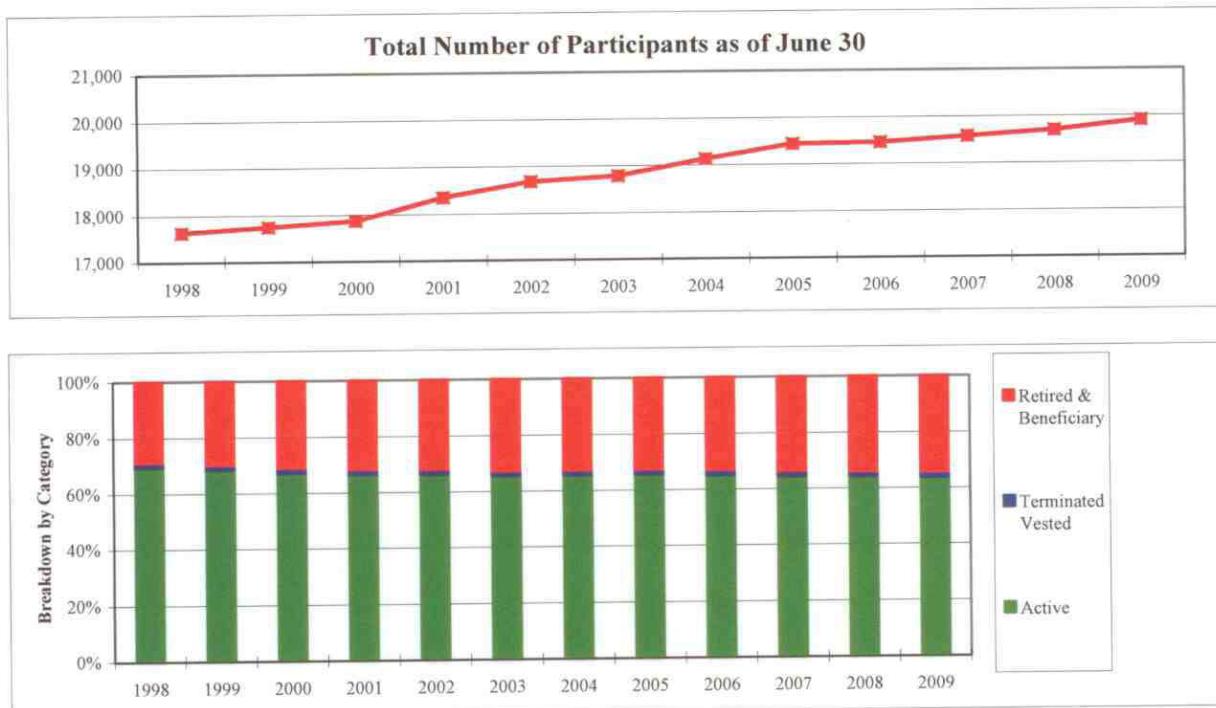

Valuation date: 06/30/2009
Actuarial cost method: Entry Age Normal (Traditional)
Amortization method: Level Percentage of Payroll
Remaining amortization period: 30-year constant (open basis)
Asset valuation method: Market Value adjusted to reflect investment gains and losses over a five (5) year period. See Tables VIII and X for a more detailed explanation of Actuarial Value of Assets methodology.

Actuarial assumptions:
Investment rate of return* 8.00%
Projected salary increases* 5.00%
Post-retirement benefit increases Other than the automatic increase of 3.00% every two (2) years applicable to salary cap of Certification 139,
NO postretirement benefit increases are assumed.
Mortality Table 1994 Group Annuity Mortality

*Includes inflation at 3.50%

* Including contribution receivable.

** Market value yield calculated assuming middle of the year income / outflow.

FOR THE DETERMINATION OF CONTRIBUTION AMOUNTS**1. Actuarial Cost Method**

- The Entry Age Normal Cost (traditional) method was used. Under this method the actuarial present value of all plan benefits at the entry age is summed and divided by the present value of future salaries. This ratio is multiplied by all future salaries from the valuation date forward to arrive at the present value of future normal costs and hence the entry age accrued liability and normal costs.

2. Interest Rates (Investment Earnings and Discount Rate)

8.00% per annum, net of investment expenses.

3. Administrative Expenses

0.50% of total payroll of covered employees.

4. Salary Increases

5.00% per annum.

5. Decremnts**• Pre-Retirement Mortality**

1994 Group Annuity Mortality. For purposes of benefits due to death in service, it is assumed that five percent (5.00%) of such deaths are service related. Representative values of the assumed annual rates of pre-retirement mortality among members in active service are as follows:

Age	Men	Women
20	0.051%	0.028%
25	0.066%	0.029%
30	0.080%	0.035%
35	0.085%	0.048%
40	0.107%	0.071%
45	0.158%	0.097%
50	0.258%	0.143%
55	0.442%	0.229%
60	0.798%	0.444%
64	1.294%	0.762%

- **Post-Retirement Healthy Mortality**
1994 Group Annuity Mortality Table.
- **Post-Retirement Disabled Mortality**
100% of disabled life mortality rates from Social Security Actuarial Study No. 75.
- **Disability**
Representative values of the assumed annual rates of disability among male and female members in active service are as follows (65% of the projected disabilities are assumed to be due to occupational causes):

Age	Males	Females
20	0.071%	0.035%
25	0.085%	0.049%
30	0.111%	0.085%
35	0.151%	0.134%
40	0.218%	0.200%
45	0.331%	0.298%
50	0.544%	0.469%
55	0.941%	0.762%
60	1.360%	0.930%

- **Permanent Withdrawal from Active Status**
Representative values of the assumed annual rates of withdrawal among members in active service are as follows:

Age	Rate
20	8.00%
25	7.80%
30	7.30%
35	6.40%
40	5.20%
45	4.20%
50	3.00%
55	1.90%
60	0.00%

- **Retirement**

In accordance with the following schedule:

Age at Hire	Retirement age
20 - 24	55 (58*)
25 - 29	Age at hire + 30 But not greater than 58
30 - 34	58
35 - 39	58
40 - 44	58
45 - 48	58
49 & Over	Hire age + 10

* If less than 20 years of service by July 1, 1979, did not elect Certification 55 and did not elect full supplementation

6. Percent Married

80% of participants are presumed married for purposes of spousal benefits.

7. Assets

The actuarial value of assets is determined by adjusting the market value of assets to reflect investment gains and losses (the difference between the actual investment return and the expected investment return) during each of the last five (5) years at the rate of 20.00% per year. Expected investment return is calculated from the prior market value of assets, including receivable contributions, and weighted expected transactions.

8. Valuation Group

All employees active or on leave of absence, inactive participants with deferred benefits or entitled to return of their own contributions, retirees and beneficiaries are included in the valuation.

9. Benefit Increases (Pre and Post Retirement)

Other than the expected increase in the salary limitation of Certification 139, no postretirement benefit increase is assumed. Increases are granted from time to time and the annual required contribution is adjusted accordingly.

FOR DETERMINATION OF GASB ACCOUNTING INFORMATION

The determination of the GASB Nos. 25 and 27 accounting information has been made on the basis of the same assumptions and methods used for the determination of the funding amounts. Our actuarial valuation as of June 30, 2009 is based on the benefit provisions of the University of Puerto Rico Retirement System as of the valuation date, which are summarized in this section.

1. **Provisions applicable to those members who had completed 20 years of services by July 1, 1979:**
 - a) Service retirement annuity payable:
 - i) After 30 years of service; or
 - ii) At age 58 after 10 years of service; or
 - iii) At age 55 after 25 years of service.
 - b) Amount of service retirement annuity:
 - i) Before age 65 – member with at least 30 years of service: 75% of average compensation if age 55 at beginning date; 65% if under age 55. If member completed 30 years of service before July 1973, annuity is increased by 2% of average compensation for each year of service beyond 30 and before July 1973, but to not more than 85% of average compensation.
 - ii) Before age 65 – member with less than 30 years of service: 1.50% of average compensation per year of service for member with 20 or fewer years. Percentage increased by 0.05% for each year in excess of 20 years up to a maximum of 1.95% of average compensation per year of service. Amount reduced by $\frac{1}{2}\%$ for each month member is under age 58 at time annuity begins.
 - iii) After age 65 – if member elected full supplementation annuity is the same as before age 65. Otherwise, annuity is reduced at age 65 by $\frac{1}{2}\%$ of first \$350 of average compensation for each year of service up to 30 years.
 - iv) Minimum annuity: \$250 per month.
 - v) Average compensation means the average for the highest-paid 36 months of service without limit on compensation.
 - vi) Employee contributions:
 - Complete supplementation: 7.00% of compensation.
 - Coordinated: 4.00% of compensation up to \$4,200 plus 6.50% of compensation in excess of \$4,200.

2. **Provisions applicable to all members who were affected under Certification 37 and who had not completed 20 years of service by July 1, 1979 plus those members who entered the system on or after July 1, 1978 and who did not elect Certification 55 or 94 and did not elect full supplementation under Certification 54:**

- a) Service retirement annuity payable:
 - i) After 30 years of service; or
 - ii) At age 58 after 10 years of service; or
 - iii) At age 55 after 25 years of service.
- b) Amount of service retirement annuity:
 - i) Before age 65 – member with at least 30 years of service: 75% of average compensation. Amount reduced by $\frac{1}{2}\%$ for each month member is under age 58 at time annuity begins.
 - ii) Before age 65 – member with less than 30 years of service: 1.50% of average compensation per year of service for member with 20 or fewer years. Percentage increased by 0.05% for each year in excess of 20 years up to a maximum of 1.95% of average compensation per year of service. Amount reduced by $\frac{1}{2}\%$ for each month member is under age 58 at time annuity begins.
 - iii) After age 65 – Benefit is coordinated. Annuity is reduced by $\frac{1}{2}\%$ of average compensation not in excess of the Social Security wage base in effect at retirement for each year of service up to 30 years. If member was under age 58 at beginning date, the coordination adjustment is made before application of $\frac{1}{2}\%$ reduction per month under 58.
 - iv) Minimum annuity: \$250 per month.
 - v) Average compensation means the average for the highest-paid 36 months of service, excluding that portion of compensation in any year which is in excess of \$35,000.
 - vi) Employee contributions for coordinated benefit: 5.00% of compensation up to maximum salary of \$35,000.

3. **Provision applicable to all members who were affected by Certification 37 and who had not completed 20 years of service by July 1, 1979 as well as those members who entered the system on or after July 1, 1978 and later elected Certification 55 or those who elected full supplementation under Certification 54 (but not Certification 94):**

- a) Service retirement annuity payable:
 - i) After 30 years of service; or
 - ii) At age 58 after 10 years of service; or
 - iii) At age 55 after 25 years of service.
- b) Amount of service retirement annuity:
 - i) Before age 65 – member with at least 30 years of service: 75% of average compensation. Amount reduced by 1/3% for each month member is under age 55 at time annuity begins.
 - ii) Before age 65 – member with less than 30 years of service: 1.50% of average compensation per year of service for member with 20 or fewer years. Percentage increased by 0.05% for each year in excess of 20 years up to a maximum of 1.95% of average compensation per year of service.
 - iii) After age 65 – if member elected full supplementation, annuity is the same as before age 65. Otherwise, annuity is reduced by ½% of average compensation at time of retirement multiplied by years of service up to 30 years.
 - iv) Minimum annuity: \$250 per month.
 - v) Average compensation means the average for the highest-paid 36 months of service, excluding that portion of compensation in any year which is in excess of \$35,000.
 - vi) Employee contributions:
 - Complete supplementation: 7.00% of compensation up to compensation limit of \$35,000.
 - Coordinated: 4.00% up to \$4,200 of compensation plus 6.50% of the excess up to the compensation limit of \$35,000.

4. For those entering between January 1, 1990 and June 30, 1998 who did not elect Certification 94:

- a) Service retirement annuity payable:
 - i) After 30 years of service; or
 - ii) At age 58 after 10 years of service; or
 - iii) At age 55 after 25 years of service.
- b) Amount of service retirement annuity:
 - i) Before age 65 – member with at least 30 years of service: 75% of average compensation. Amount reduced by 1/3% for each month member is under age 55 at time annuity begins.
 - ii) Before age 65 – member with less than 30 years of service: 1.50% of average compensation per year of service for member with 20 or fewer years. Percentage increased by 0.05% for each year in excess of 20 years up to a maximum of 1.95% of average compensation per year of service.
 - iii) After age 65 – All completely supplemented.
 - iv) Minimum annuity: \$250 per month.
 - v) Average compensation means the average for the highest-paid 36 months of service, excluding that portion of compensation in any year which is in excess of \$35,000.
 - vi) Employee contributions:
 - All completely supplemented: 8.00% of compensation up to compensation limit of \$35,000.

5. Certification 94:

- a) Increase compensation up to \$50,000.
- b) Those electing coverage under the above certification agree to pay 9.00% of compensation up to \$50,000.

6. Certification 139:

- a) Increase compensation up to a \$60,000 maximum. The \$60,000 cap is increased by 3.00% every two years. The 2009 maximum compensation is \$65,564.
- b) Those electing coverage under the above certification agree to pay 11.00% of compensation up to \$60,000.

7. Disability Benefits

- a) A disability retirement annuity is payable upon:
 - i) Disability due to occupational causes, regardless of service, or
 - ii) Disability due to non-occupational causes after 10 years of service. If member is also eligible for a service retirement annuity, benefit payable is the higher of the two.
- b) Amount of disability retirement annuity:
 - i) Before age 65 – If service connected, 50% of rate of salary at retirement. If not service connected, 30% of average compensation plus additional 1.00% for each year of service over 10 (subject to a maximum of 50%).
 - ii) After age 65 – Reduced to amount payable by the applicable retirement benefit formula above. However, if post 65 retirement benefit plus Primary Social Security benefit is less than pre 65 disability benefit, then post 65 benefit is adjusted (increased) by the amount necessary to match pre 65 disability benefit.
 - iii) Minimum annuity: \$250 per month.

8. Vested Benefits

A member whose employment terminates after ten (10) years of service, and who does not withdraw his contributions, receives a retirement annuity payable beginning at age 60 based on the applicable retirement formula above.

9. Non-vested Termination Benefits

If termination of employment occurs prior to completing ten (10) years of service, member is entitled only to a refund of his / her own contributions. Refund of a member's own contributions can also be obtained after attainment of ten (10) years of service but in that event the vested benefit is forfeited.

10. Pre-retirement Death Benefits

- a) A pre-retirement death benefit is payable upon:
 - i) A service-connected death, or
 - ii) A non-service connected death.
- b) Amount of pre-retirement death benefit:
 - i) The widow of a deceased member whose death is service-connected receives an annuity of 50% of final salary, plus \$10 per month for each child under age 18 (21 if at school) or disabled. If no annuity is paid to widow, \$20 per month per eligible child. Widow receives annuity until death or remarriage. Maximum family benefit is 75% of final salary.

If there is no surviving widow or eligible children, a lump sum amount equal to the member's contributions plus one year's final salary (subject to applicable salary cap), but not less than \$6,000, will be payable to the employee's designated beneficiary.
 - ii) Should the member's death be non-service connected then a lump sum amount is paid which is equal to the member's contributions plus one year's final salary (subject to applicable salary cap), but not less than \$6,000.

11. Post-retirement Death Benefits

Member contributions are refunded to the extent that they exceed retirement payments already made, unless a reversionary annuity was elected. Minimum payment is \$600. In addition, 50% of retirement annuity is payable to the surviving spouse until death, remarriage, or until the spouse begins to receive Social Security benefits. Minimum annuity, \$75 per month; maximum annuity, \$150 per month.

12. Reversionary Annuity

Member may elect to receive a reduced annuity in order to provide a lifetime benefit after death to a spouse or relative. The benefit to the spouse or relative may be as low as \$25 per month or as high as 100% of the member's reduced annuity. This option is not permitted if member retires on a disability annuity.

13. Christmas Bonus

A \$400 annual bonus is given to all retired participants.
